mioplast

For quality, cost and reliability, MIOPLAST is the packaging partner of choice.

Kalitesi, fiyat avantajı ve güvenirliği ile çözüm ortağınız MIOPLAST.

MIOPLAST manufactures aluminium foil containers and catering disposables for the food industry throughout Europe and other international markets. We offer high quality food containers and take away foil containers for all markets in Food Sector. We are one of the largest food packaging company in TURKEY.

We have earned our reputation as a specialist manufacturer of aluminium foil containers. However, our product range incorporates a number of other items that are used in conjunction with the containers in food processing or food service applications.

Our portfolio of products now comprises:

- Conventional aluminium foil containers
- Foil Board Lids
- Aluminium foil Rolls
- Stretch (Cling) Film Rolls

ISO 9001:2015 Quality, ISO 22000:2005 Food Safety and BRC IOP Packaging Management Systems are used in MIOPLAST.

Mioplast firması genel olarak gıda endüstrisi için Avrupa ve diğer uluslararası pazarlara alüminyum folyo ve hazır yiyecek kapları üretmektedir. Bu ürünler yüksek kalite ve hijyen standartlarına uygun olarak üretilmekte olup, yurtiçi ve yurtdışı pazarlarda faaliyet gösteren son kullanıcı veya ithalatçı/distribütör firmalara ulaştırılmaktadır. Bu yüzden diyebiliriz ki, Miopack / Mioplast Ambalaj, Türkiye'nin en büyük gıda ambalajı üreticisi firmalarından birisidir.

Mioplast sahip olduğu alüminyum folyo kap üretimi teknolojisi ile standart ürünlerin yanında, müşteri odaklı özel üretimler de gerçekleştirebilmektedir. Bu sayede gıda üretiminde ya da yiyecek servisinde ihtiyaç duyduğu ambalajı arayan firmalara avantaj sağlamaktadır.

Ürün portföyümüz;

- Alüminyum folyo kaplar
- Plastik, alüminyum ve laminell karton kapaklar
- Alüminyum folyo rulolar
- Gıda ambalajları için streç filmler.

Aluminium containers protect perishable goods from all harmful environmental influences – even in the most extreme climates.

Aluminium containers are hygienic. Its surface cannot become a breeding ground for bacteria and other micro-organisms.

Aluminium is a totally inert material which doesn't allow any migration from or in to the product it has to protect. No odour, flavour or aroma can penetrate or escape.

Aluminium containers keep products fresh for a long time without quality deterioration.

Aluminium is light, so this is an advantage which is equally beneficial for processors, salesman and shoppers.

Aluminium containers are handy, elegant and practical.

Aluminium containers are resistant because of their rigidity and will not become deformed during cooking.

Aluminium containers can readily be used in traditional ovens and in microwave ovens.

Aluminium is ecological because;

- Energy consumption has been reduced by 30 % during its production methods.
- Over 30% of the worldwide production is made from recycled scrap.
- It saves energy.

Alüminyum kaplar çabuk bozulan gıdaları bütün çevresel ve mevsimsel etkilerin olumsuzluklarından korur.

Alüminyum kaplar hijyeniktir. Yüzeyinde bakteri ve diğer mikroorganizmaların üremesi için ortam oluşturmaz.

Tamamen inert (etkisiz) bir metal olan alüminyum içine konulan gıdalara ya da gıdalardan kendisine bir geçişe izin vermez. Bu yüzden gıdalarda herhangi bir koku, tat, renk kaybı ve değişikliği söz konusu değildir.

Alüminyum kaplar ürünleri uzun süre tadı ve lezzeti bozulmadan muhafaza eder.

Alüminyum hafif bir ürün olduğundan uygulayıcılar, satış elemanları ve dükkan sahipleri için avantajlı bir malzemedir.

Alüminyum kaplar kullanışlı, zarif ve pratiktir.

Alüminyum kaplar rijitlik özelliği nedeniyle pişirme işlemi sırasında deforme olmazlar.

Alüminyum kaplar geleneksel fırınlarda (gazlı, elektrikli) ve microdalga fırında kullanılabilir.

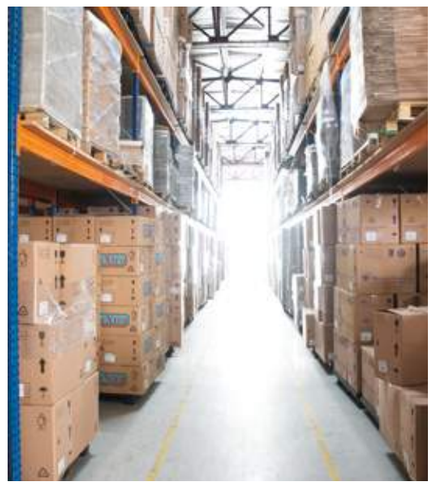

Alüminyum ekolojiktir çünkü;

- Üretim tekniği (soğuk şekil verme) nedeniyle proseste %30 daha az enerji tüketilir.
- Dünya alüminyum üretiminin en az %30'unda geri dönüşüm malzeme kullanılmaktadır.
- Isıyı muhafaza etme özelliği nedeniyle enerji tasarrufu sağlar.

Aluminium foil and microwave ovens

Aluminium trays in the microwave oven: The right way to do it

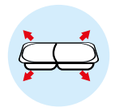

The aluminium lid must be removed from the tray before use.

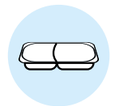

The meal should cover most of the floor of the tray.

Place the aluminium tray in the middle of the turntable in the microwave oven.
Attention if your microwave oven is equipped with a metal turntable, please place a ceramic or glass plate beneath to tray.

The aluminium dish must not come into contact with the walls of the microwave oven.
(Minimum distance to the walls: 2 cm)

Only one aluminium tray may be used in the microwave oven at a time.

The use of alufoil containers in microwave ovens is safe

Conclusive evidence that aluminium foil packaging can be used safely in microwave ovens has been established by a study from the Fraunhofer Institute for Process Engineering and Packaging IVV in Freising, Germany.

The results dispel the myth that aluminium foil containers are unsafe for use in microwave ovens and prove that consumer fears about using alufoil packs in the microwave are unfounded.

In fact in some instances consumer convenience is improved as not only are alufoil packs more rigid, something that is equally applicable to dual-ovenable containers, the use of aluminium foil enhances the appearance of the food when heated in the microwave oven. For example the study found that in the case of lasagne heated in a microwave oven its visual appearance was superior as a brown crust was formed on the surface.

Conducted on behalf of the European Aluminium Foil Association (EAFA) with the support of the Aluminium Foil Container Manufacturers Association (AFCMA) the study concluded, “Microwave heating of food packaged in aluminium foil trays or in plastic containers with aluminium foil or aluminium laminated lids is perfectly viable.”

No hazardous results or damage to ovens were found in the more than 200 food portions that were heated in aluminium foil containers or packs containing aluminium foil.
